IMPORTANT RESOURCES

For many birds, May means migration. Did you know there are many species of migrating insects as well? Lots of dragonflies, Monarch butterflies, and moths take to the air and join birds in some of the longest migrations on Earth in search of resources and nesting sites. Make their trip easier and more productive by providing the habitat they are looking for. Then let us know what you see!

May is a good time to:

- [Add bird sighting to your habitat map.](#)
- [Plant something new.](#)
- [Do spring garden clean-up](#)
